New York Speculators Start a Boom on Good Washington News.

Better Bank Statement Expected To-Day-Indianapolis Wheat Dull and Other Grains Easier.

At New York, yesterday, money on call was easy at 203 per cent., the last loan being at 21/2, closing offered at 3.

Prime mercantile paper, 71/2012 per cent. Sterling exchange was steady, with actual business in bankers' bills at \$4.86% @4.87 for demand and 4.84%@4.85 for sixty days. Posted rates, \$4.86@4.88; commercial bills, \$4.83@4.8314.

Silver certificates, 74%@75. Bar silver closed at 74c per ounce; Mexican dollars at 58%c. At London bar silver closed at 34%d. The total sales of stocks were 275,200

It was a bull market on the New York Stock Exchange yesterday, and the speculation resulted in a substantial improvement in almost everything dealt in, specialties as well as the active list. The general permeating influence was the more cheerful tenor of the advices from Washington giving almost certain promise of the passage of the silver bill at no distant day, and without conditions that might rob it of a full fruition of usefulness in restoring stability to the finances of the country. Another factor in the advance was the reduction in the sterling exchange rates, which was regarded as removing still further from the calculations of the street the threatened gold shipments. Another point in interest, too, was the promise of a favorable bank statement to-morrow, it being stated authoritatively that some \$5,000,000 in currency had been received from the West during the past week. Special influences were also at work in several of the active and some of the usually torold shares. Sugar was moved upward on large purchases said to be chiefly for the Philadelphia account and based on prospective increased earnings by reason of the impetus given to the sugar trade, which has set the refineries of the trust running to their full capacity. Louisville & Nashville was the one stock which was borne down by a pretty sharp selling movement developed right at the opening, the first price made being 1% per cent. lower than yesterday's closing, and the bottom not being touched until a further decline of 1% per cent. had been effected. The depression was supposed to be due to the threatening aspect of the company's employes, but it was based on a far more important matter, being none other than a contemplated issue of five millions additional stock, which will bring the capital stock up to \$60,00,000. The dealings in General Electric were heavy during the morning on rumors of the organization of a big electrical syndicate in which one of the directors of the general company was interested. Mr. D. C. Mills, director in question, denied resign, expressed ignorance of the formation of an opposition company. The shares did not remain under a cloud for long, and advanced 1% per cent. higher than yesterday's closing. At the close it was found that, compared with Thursday, the list prices of yesterday were 3/04 per cent. higher, the latter in American Tobacco and Consolidated Gas. The other important advances were Cleveland, Cincinnati, Chicago & . St.

Island, 11/2, and Reading, 1%. The railroad bond market was generally strong, the Reading issues being most prominent in the dealings. Chicago & Erie incomes sold 6 per cent. above the last pre-

INDIANAPOLIS GRAIN AND PRODUCE.

Wheat Remains Quiet, with Corn Still Declining-A Quiet Day.

There was an air of quiet, approaching duliness on the street yesterday. There was no sign of weakening in prices, however, and quotations are practically without change in all lines of trade. Th produce market holds firm in everything. Eggs are scarce, and shippers are still paying 17c. Butter meets with a demand sufficient to readily absorb all receipts of good quality. Fruits and vegetables are steady, the fluctuations in prices being fewer than usual. Sweet potatoes are 25c per barrel lower for both Baltimores and Jerseys. In the grain market the dullness that has been so marked a characteristic for weeks past continues. Wheat prices were unchanged yesterday, but receded 16c on all grades of yellow, while oats advanced %c on No. 3 white, and 14c on No. 3 mixed. The clos-

ing bids on 'Change were: Wheat-No. 2 red, 60c; No. 3 red, 57c; rejected, by sample, 40@50c; wagon, 60c. DUN & CO.'S REVIEW

Failures Last Quarter 4,000 and Liabilities \$150,000,000.

The Present Outlook for Trade Not What Was Expected and Business Takes an Ominous Setback.

NEW YORK, Sept. 29 .- R. G. Dun & Co.'s weekly review of trade says: A complete statement of failures for the quarter which will close to-night is not possible, but the number thus far reported is about 4,000, and the aggregate of liabilities about \$150,000,000, surpassing the record of any previous quarter. For the past week the failures have been 329 in the United States, and in Canada thirty-four. "Hope !deferred" explains the past week in part, and it is doubtless true, many have indulged unreasonable hopes, but business has not entirely answered expectations. It is also true that many works which have resumed operations do not find orders so large or the demand from consumers so vigorous as they anticipated. With some it is a question whether they will not close again. While money on call has been abundant and cheap and about \$4,000,000 clearinghouse certificates have been retired thereis perceptibly greater caution in making commercial loans here and at some Western points. Confidence proverbially of slow growth has been somewhat diminished, in part, because advancing exchange suggests the possibility of gold exports. Railroad earnings for September show a decline of 13 per cent., compared with last year. On Western lines and trunk lines the decrease is somewhat smaller, but Southern and Pacific roads do not materially improve, and east-bound shipments from Chicago show a decrease of 14 per cent, for the last week. Wheat receipts decrease again and fall far behind last year's, but stocks in sight are too heavy, and the price for December fell nearly 1c. Corn continues to come forward freely, and crop reports are not more unfavorable, but the price fell 1%c. Changes in pork products were obviously due rather to manipulation than to any change in the outlook. Cotton declined also about 31-16c, with no great change in the movement or in crop prospects, and increasing work by the mills in this country.

The cotton manufacture is gaining more than any other, and there is a stronger market for print cloths and prints, while some reduction has helped to stimulate trade in other goods. Trade in woolen dress goods is better, and there is a little more demand for men's woolens. Sales of wool last week were 4,629,450 pounds, against 6,488,600 last year, and for four weeks 14,473,270 pounds, against 31,000,500 last year, but it is expected that many purchases are for investment rather than for manufacture.

While seventy-eight manufacturing concerns are reported as starting wholly, or in part, against twenty closing or reducing force, more than a third of the increase has been in cotton mills and another third in machine shops, nail mills, manufactures of stoves and hardware, tools and cars, while in the iron manufacture proper only seven concerns have started against three that have stopped; and the outlook does not seem brighter. Chicago is adding to her marvelous buildings, and in structural and some other forms the demand at the West is clearly increasing. But the closing of the largest iron mine in the country, the Norrie, which ordinarily produces a million tons yearly, indicates the limited character of the business. At the East the demand for products is painfully inadequate, even for the scanty force now at work, and the lowest prices on record attract little busi-

In boots and shoes the marked activity seen in New York is not found at the East, but the rubber works are all fully employed, and the demand for their prod-The return of money from the interior

continues large, and plainly reflects less activity than usual at this season in domestic trade and industry.

The Worst on Record. NEW YORK, Sept. 29.-Bradstreet's tomorrow will say: It will be no surprise to learn that the total number of business embarrassments during the past nine months will aggregate 11,174, or 51 per cent. more than in a like portion of 1892, when the total was only 7,378, and 26 per cent. more than in the corresponding period in 1891, which was 8,866, the heaviest previous nine month's total of mercantile embarrassments on record. When one comes to consider totals of assets and liabilities in connection with the very heavy number of business failures reported, the significance of the financial crisis of the past few months is forced home. This becomes apparent when one reads that the 11,174 embarrassments reported during the past nine months carry liabilities aggregating \$324,087,768, about four and quarter times the aggregate indebtedness of 7,378 embarrassed individuals, firms and corporations in a like period of 1892 and nearly two and one-half times the total indebtedness of the 8,866 concerns reported as having suspended in nine months of 1891. The largest aggregate indebtedness of failing traders ever reported in nine months in any preceding calendar year was in 1884, a year of panic also, in which the total number of failures reported during nine months was 8,402, and aggregated liabilities \$195,951,000, only 60 per cent. of the like indebtedness reported thus far in 1893. The total number of failures reported in 1884 amounted to only 74 per cent. of the aggregate thus far this

An Embarrassment of Riches,

Indiana did well-a trifle too well, perhaps, at the world's fair. A crowd so dense and enthusiastic that an ex-President of the United States has to turn himself into an ambulance corps to save women from being crushed to death is rather an embarrassmert of riches. The Hoosiers meant well, though. They wanted to see all the sights, near all the speeches and have all the fun in sight. That was not only natural but commendable. That some overenthusiastic individuals-presumably from

BULGE AT THE CLOSE

Chicago Wheat Lifeless Until the Last Hour It Advanced 1c.

Most of the News Favored the Bears, but a Report that Portugal Would Lower the Tariff Lent Strength.

CHICAGO, Sept. 29 .- A sharp upturn in wheat occurred to-day just at the close. The cause most generally assigned was the boom in stocks at New York, said to be due to a report that the Senate had agreed to vote at once on the silver bill. Corn was dull and about steady and provisions stagnant and irregular in price. Fluctuations in wheat were confined to a range of %c until the last half hour, when the market decidedly showed evidence of life and advanced quickly about 1c, closing firm at 1/2c higher than last night. The big receipts in the Northwest-993 cars to-day, against 739 cars the same day last year-made a weak factor. Cables and domestic markets were also weaker, and the export movement was small. This, with a dull and narrow trade, favored weaker prices. The report that Portugal had reduced its duty to admit of the importation of 5,000,000 bushels of foreign wheat had the effect of making the bears cautious. Charley Smith was supposed to be a big buyer during the closing In corn first trades were at yesterday's

closing prices, and soon afterwards sold down 4c, when the buying became more urgent, sent the price up %c, reacted a little, ruled firmer, and closed with a fractional gain. There was no important or significant trading by the parties largely interested, though a prominent shipping concern lead the selling and a commission house the buying.

Only a light scalping business was transacted in oats. Prices held within %c range, and closed at 1/601/4c advance. The tone of the provision market, little there was of a market, was firm .-

Compared with last night, the close shows October pork 5c lower, January 5c higher, September lard .15c lower, October .05c lower, January .05c higher. Ribs for September are off .30c, October is unchanged, and January is 5c higher.

There was a fair demand for vessel room, and ample offerings to load next week at 24c for wheat and 2c for corn to Buffalo. Port Huron rates on corn were 1%c. For boats to load to-day and to-morrow 21/20 was the price paid for wheat and 24c for corn to Buffalo. Estimated receipts for to-morrow are: Wheat, 180 cars; corn, 200

Suggestion that Congress Get After the Railroad Companies.

New York Herald. As will be seen from our news columns this morning another calamity is added to the long list of recent railway disasters. Like its predecessors it is due to gross negligence and involves a loss of life due to manslaughter. As in the others an attempt will probably be made to fix the sole responsibility on some employe, and there the matter will drop. It is about time to deal more rigorously with the company itself in the case of these deadly calamities which are now occurring every week. The prime cause of the disaster is often to be found in defective construction or equipment, or lack of precaution in the system of running trains. When this is the case the responsibility for a calamity obviously falls upon the company or its officers, and consequently they should be held to answer. It is a curious fact that, while Congress has legislated for the regulation of traffic on railways and for the safety of the lives of employes, it has done nothing to make travel safer for passengers. If railroad corporations will not exercise the greatest care in the running of passenger trains, or adopt the precautions essential to avert terrible accidents. they should be required by legislation to do so. These disasters are becoming altogether too common in railway travel.
